Executive Summary

Camin Civil specialises in providing expert commercial consultancy for the mining, construction and resource sectors Australia-wide.

Established in 2019, our team is focused on optimising contract management processes to ensure that projects are delivered efficiently, within budget, and to the highest standard.

Camin Civil offer on-going and ad-hoc contracting support tailored to meet your company's unique needs. With a proven track record in contract development, management and risk mitigation, we understand the importance of efficiency, precision, and adherence to industry standards when delivering high-value projects.

Well-versed in the complexities of commercial contracts, we provide flexible, responsive support to ensure projects are set-up and managed with clarity, compliance, and confidence.

Our services are designed to streamline operations, reduce risks, and improve overall project outcomes. With deep industry expertise and a commitment to excellence, Camin Civil delivers customised solutions that empower businesses to navigate complex contractual landscapes with confidence.

We look forward to the opportunity to collaborate and contribute to your continued success.

Core Contracting Consultancy Services

Tender Package Development & Evaluation

Comprehensive support in preparing, evaluating, and negotiating tender packages to secure favourable terms and competitive bids.

Contract Drafting & Review

Assisting clients with precise and tailored contract drafting, ensuring clarity, compliance, and alignment with project objectives.

Contract Negotiation & Risk Management

Facilitating successful contract and subcontract negotiations by identifying and managing risks while securing favourable and strategic terms aligned with our clients' corporate objectives.

Contract Performance Management

Monitoring contracts after execution to ensure that performance standards are met, resolving disputes, reviewing, drafting and negotiating variations and supporting project teams in managing contract lifecycles effectively.

Experience in building strong relationships with clients and stakeholders to enhance collaboration and communication.

Process & Procedure Development

Creation of corporate and commercial procedures, including contract lifecycle management processes, to enhance operational efficiency and ensure employees managing the day-to-day operations of projects are equipped with clear and concise company guidelines for success.

Team Training and Development

Providing comprehensive training for project teams on their contractual responsibilities, ensuring they understand key terms, compliance requirements, and risk management principles. This includes fostering best practices in contract management, such as accurate documentation, proactive issue identification, and effective communication with stakeholders to enhance overall contract performance and minimise disputes.
